- Protection gap & insurance
- Digital transformation
- Sustainable insurance

KEY DETAILS

Programme type: On campus open programme

Location: FTU Ohrid, Macedonia, Insurance and Risk Management Department

Start date: 22 June 2026

Duration: 1-week, full time

OVERVIEW

Insurance is changing — shaped by regulation, technological innovation, emerging risks and new business models.

The EERIA Summer School provides a structured and practice-oriented understanding of these developments from both industry and supervisory perspectives.

Through expert-led sessions and peer exchange, participants develop capabilities relevant to regulation, corporate governance, risk-based supervision, digital transformation and sustainability.

The result is practical knowledge that can be applied immediately in a professional context.

BENEFITS FOR YOU

- Develop a comprehensive **understanding of insurance business models**, regulatory frameworks and risk-based solvency from both industry and supervisory perspectives
- **Strengthen your ability to navigate complex regulation** and support sound strategic decision-making
- **Gain forward-looking insights** into distribution, corporate governance, digital transformation, artificial intelligence and sustainable insurance
- **Learn from international experts** through interactive, practice-based sessions and real-world case discussions
- **Expand your professional network** across insurers, intermediaries and supervisory authorities while enhancing your profile with advanced, future-oriented competencies

BENEFITS FOR YOUR ORGANISATION

- **Strengthen alignment** between strategic objectives and supervisory expectations
- **Develop professionals** capable of bridging communication gaps between industry and regulators
- **Enhance organisational readiness** for risk-based supervision, digital innovation and sustainability-driven transformation
- **Leverage international best practices** and insights from diverse markets and regulatory environments

HOW YOU LEARN

EERIA Summer School offers an **intensive executive learning experience** integrating industry practice, supervisory insight and academic expertise. The programme equips participants to **translate complex regulatory and market developments into practical strategies** and informed decision-making.

Learning takes place through:

- **Expert-led sessions** bringing together perspectives from insurers, intermediaries and supervisory authorities
- **Interactive dialogue** linking regulatory frameworks with real-world business challenges
- **Case-based exploration** of risk-based solvency, corporate governance, distribution, digital transformation, artificial intelligence and sustainable insurance
- **Structured peer exchange** in an international, cross-sector environment
- **An intensive executive format** emphasising practical application and measurable outcomes

IMPACT

WHO ATTENDS?

The programme is designed for mid- to senior-level professionals from insurance companies, intermediaries and regulatory and supervisory authorities seeking a broader, strategic understanding of the insurance ecosystem.

Participants typically include:

- Managers and specialists in risk, compliance, underwriting, actuarial functions, strategy, distribution and operations
- Professionals from insurance intermediaries and distribution organisations
- Representatives of regulatory and supervisory authorities involved in insurance oversight and policy development
- High-potential professionals preparing for senior leadership roles requiring cross-functional and cross-sector insight

FEE AND ELIGIBILITY

Tuition fee: **1,100 EUR**

- This covers all tuition, course materials, daily lunches and networking events. You will receive an EERIA certificate of completion at the end of the course.

Admission is subject to the following criteria:

- **Fluency in English**
- **Minimum three years' professional experience.**
